Multi-Agent Intelligence & Evidence Progression

[SYNTHETIC DEMO DATA NOTICE] This report record is derived from synthetic demonstration data (*aperio_synthetic_deforestation_dataset.csv*) and does not represent verified satellite ground truth.
1. Satellite Optical Ingestion: Simulated Sentinel-2 multi-spectral canopy reflectance with NDVI change calculation.
2. SAM Segmentation: Simulated Zero-Shot Segment Anything canopy loss mask.
3. XGBoost & Bayesian Sequential Update: Optical disturbance and SAR backscatter features updated beliefs to calibrated probability rating of **1%**.
