Multi-Agent Intelligence & Evidence Progression

1. Satellite Ingestion: Copernicus Sentinel-1 C-SAR IW mode acquired observation passes over Tinsukia. Radar backscatter penetration enabled continuous surface change mapping.
2. DEM Terrain Modeling: Horn algorithm computed local terrain slope of 35.0° across drainage lines.
3. SAM Spatial Segmentation: Delineated spatial impact boundary encompassing high-risk terrain.
4. XGBoost & Bayesian Sequential Update: Domain evidence likelihoods updated sequential prior belief to yield calibrated posterior risk of **59.6%**.
