APERIO | AUTONOMOUS EARTH INTELLIGENCE PLATFORM

AUTHORITY DISASTER INTELLIGENCE ASSESSMENT • FLOOD

Location: Dibrugarh & Basin, Assam, India • Generated: 08 Oct 2026 04:23 UTC • Status: APPROVED BY OPERATOR

Target Event	Flood • Dibrugarh & Basin	**Risk Probability**	**78% (HIGH)**
Affected Area	18.6 km²	**Model Confidence**	88% Indicative
Exposed Population	8,140	**Antecedent Rainfall**	142 mm (72h: 572mm)
Terrain Slope	4° (Steep escarpment)	**SAM Scar Boundary**	Validated (7.03 km²)
Satellite Observation	Sentinel-1 SAR + Sentinel-2 MSI	**Human Verification**	APPROVED BY OPERATOR

Multi-Agent Intelligence & Evidence Progression

1. Satellite Ingestion: Copernicus Sentinel-1 C-SAR IW mode acquired observation passes over Dibrugarh & Basin. Radar backscatter penetration enabled continuous surface change mapping.
2. DEM Terrain Modeling: Horn algorithm computed local terrain slope of 4° across drainage lines.
3. SAM Spatial Segmentation: Delineated spatial impact boundary encompassing high-risk terrain.
4. XGBoost & Bayesian Sequential Update: Domain evidence likelihoods updated sequential prior belief to yield calibrated posterior risk of **78%**.

Response Recommendations & Relocation Planning

Designation	Capacity / Occupancy	Distance / Road Status	Hazard Exposure
Designated Relief Center (Dibrugarh & Basin)	650 / 380 (270 Available)	2.4 km • Open	**LOW RISK**
Community Relief Hall West	420 / 310 (110 Available)	4.1 km • Standby	**MODERATE**
District Camp North	800 / 220 (580 Available)	6.8 km • Clear	**LOW RISK**

Accountable Operator Review & Audit Trail

Reviewing Desk: APERIO Response Operations Desk
Operator Notes: Official authority report generated by Mission Control Operator
Operational Boundary: Decision Support Output only. All evacuations require local ground confirmation.
